have to be performed. For example, the search required for Group I such as step c) of claim 1 is not required for Group II while the search required for Group II such as step c) of claim 6 is not required for Group I.

Groups I and III are distinct and independent inventions in that they are directed to methods which comprise different method steps. As a result, different and distinct searches will have to be performed. For example, the search required for Group I such as step c) of claim 1 is not required for Group III while the search required for Group III such as step e) of claim 15 is not required for Group I.

Groups I and IV are distinct and independent inventions in that they are directed to methods which comprise different method steps. As a result, different and distinct searches will have to be performed. For example, the search required for Group I such as step d) of claim 1 is not required for Group IV while the search required for Group IV such as step e) of claim 21 is not required for Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.
